Unique Light Objects

LUXONUM

Index

About us:

The company was founded by Andreas Rauwolf, who was looking for a new challenge after studying electrical engineering and many years in electrical development, software development, sales and management. The trigger for starting something new was the unexpected loss of his partner, which gave Rauwolf a new perspective on life and the priorities in his own lifestyle. The realisation that something beautiful and new can also emerge from setbacks in life flowed into the founding of the new company, which combines the themes of design, nature and state-of-the-art technology. Accordingly, the Itsu luminaire is named after his former partner.
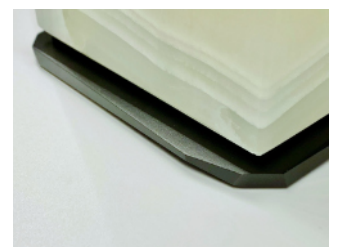

Show the facets of your personality: ITSU Two

Onyx marble gives your room an incomparably elegant atmosphere. Formed after hundreds of millions of years, onyx marble radiates a warm glow and is known for its refined decorative effect. Use these positive properties for your ambience and emphasize your uniqueness with timeless elegance.

As individual as your personality: the heart of our onyx lamps is the onyx cube, which is manufactured in Italy with the highest level of craftsmanship. A unique piece is created when we additionally coat and process the stone with gold leaf or Svarovski crystals at the customer's request to create their personal piece of jewelry.

The luminaire contains an RGBW LED module for up to 16 adjustable colors and three types of white light. The integrated rechargeable battery guarantees up to twenty hours of independent operation, for example on your patio or in the garden on warm summer evenings. Afterwards, the light is quickly recharged within 3-4 hours via USB-C. The included remote control allows you to conveniently change the lighting settings and a timer for automatic switch-off.

ITSU Two, faceted onyx cube covered with gold leaf (personalized, custom-made)

Technical Data:

| Designation	ITSU Two, Table lamp
Supply voltage	5 VDC; USB-C; plug-in power supply not included
Lighting technology	RGBW-LED, CRI >= 80 RA
Power consumption	< 4,5 W
Illuminance	< 350 LM
Light source	RGBW LED module; 16 adjustable colors; module can be replaced by qualified personnel
Dimensions L x W x H	116 x 116 115 mm
Light weight	Approx. 1,6 kg
Luminaire body	Natural onyx marble; solid
Luminaire base	Aluminium; matt black anodized
Tests / Standards	CE, IEC EN 60598-2-4
Degree of protection	IP20
Rechargeable battery	2000 mAh
Lighting duration (luminosity)	20 h (low); 8 h (medium); 5 h (high)
Charging time	3 - 4 h; light can be used during charging
Operation	Touch on the bottom side (required for initial switch-on); remote control

ITSU Two Scope of delivery:
Light, USB-C charging cable, remote control
